Hello [REDACTED]

I'm excited to apply for the Product Manager position at [REDACTED]. I have 13 years of experience bringing products to market as a product manager and UI/UX designer. Similarly to your venture studio, I am passionate about launching new innovative startups that solve problems and meet customers' needs.

I have delivered numerous successful global edTech and mobile products during my career as Product Manager at [REDACTED] and [REDACTED]. For example, I co-led the launch of an LMS and educational products that made the business profitable in the first year. Or I hired and oversaw 5 units with more than 90 employees for launching 70 online courses in the USA and Russia.

I admire [REDACTED] commitment to innovation. The adaptive education concepts in your [REDACTED] project look really interesting and inspiring. I look forward to bringing my passion and expertise in research, marketing, strategizing, and product design to help [REDACTED] continue its portfolio growth.

I am eager to discuss how my skills can contribute to [REDACTED] future. I have included my resume with my application. Thank you for your time.

Best regards,

Alexander
